37-R-5 Heavy Duty Riveted Carbon Steel Galvanized Gratings
Model Specification for type 37-R-5 Carbon Steel Galvanized Grating as Manufactured by Direct Metals, 3775 Cobb International Blvd. Kennesaw, GA 30152-4390 or approved equal.

NOTE: The specifier will need to edit this specification to reflect the options in this document shown in Red. Some editing can be accomplished by deleting unnecessary requirements. For Heavy Duty Riveted Bridge Deck please contact Direct Metals for grating type recommendation based on the specific application

SECTION 05 53 00
Metal Fabrications – Metal Gratings

Part 1: General

1.1 Section Includes
A. Prefabricated heavy duty riveted carbon steel bar gratings.
B. Prefabricated Support Frames for gratings.
C. Miscellaneous installation hardware and accessories.

1.2 References
A. ASTM A-36 Carbon Steel
B. ASTM A-1011 CS Type B Steel Strip Hot-Rolled Carbon
C. ASTM A-575 Carbon Steel Rivets
D. ANSI/NAAMM- MBG-532-09 Heavy Duty Metal Bar Grating Manual

1.3 Action Submittals
A. Product Data: The contractor shall submit the manufacturer’s catalog pages including load tables, anchor details and standard installation details.
B. Shop drawings: The contractor shall submit for approval shop drawings for the fabrication and erection of all gratings, based on construction drawings of current issue. Include plans, elevations, and details of sections and connections as required. Show type and location of all fasteners.
C. Samples of Grating and Anchorage system shall be submitted for approval.

1.4 Quality Assurance
A. Manufacturer Qualification: A company specializing in the manufacture of metal bar gratings with not less than 10 years of documented experience.
B. Fabrication tolerances shall be in accordance with applicable provisions and recommendations of ANSI/NAAMM 532-09 Metal Bar Grating Manual.

Part 2: Products

2.1 Source Requirements:
Design is based upon use of gratings as manufactured by Direct Metals and terminology used herein may include reference to the specific performance or product of this manufacturer. Such reference shall be construed only as establishing the quality of materials, operational features and workmanship to be used under this Section and shall not, in any way, be construed as limiting competition.

2.2 Manufacturers:

2.3 Manufactured Units:
A. Description: Grating: Type 37-R-5 Heavy Duty Riveted Carbon Steel Grating with Galvanized finish. Manufactured by hydraulic compression of 3/8” dia rivets to join heavy duty connecting bars 1-1/2” deep x 3/16” thick in reticuline fashion to heavy duty main bearing bars. Connecting bars are formed and punched for rivets 2-1/2” on center. Bearing bars are also punched to receive rivets 5” on center.
1. Main Bearing Bar Spacing: **2-5/16” face to face.**
2. Bearing bar thickness: **1/4”** (or 5/16” or 3/8”) as shown on the drawings.
3. Main Bearing Bar depth is to be based on loading requirements and the clear span shown on the drawings.
4. Connecting Bar 1-1/2” x 3/16” serrated and raised 1/8” above top surface of main bars.
5. Top of main bearing bars are to be smooth.
6. Rivets 3/8” diameter and spaced 5” on center along main bearing bars.

B. Fabrication: Load Band ends of grating with bars of same thickness as the main bearing bars. Weld banding flush with the top surface of the grating. Depth of banding to be ½” less than the depth of the main bearing bars as shown on the drawings. **Include welded anchor blocks ¼” from the bottom surface with hole to accept the specified attachment bolts with washers and nuts.**

C. Steel Frames: Carbon Steel ASTM A-36 frames shall be provided as shown on the contract drawings to support and attach the gratings. **Include anchors as shown for locking frame into concrete as shown on the plans. Galvanize frames after fabrication per ASTM A123.**
D. Design Criteria:

1. **Loading:** Unless shown otherwise on the contract drawings, gratings shall be designed and manufactured to meet the live load conditions of AASHTO HS 20 with 30% impact factor. Main Bearing bar depth shall be as shown on the contract drawings or as recommended by the manufacturer to meet the loading requirements, and clear span conditions.

E. **Materials:** Main Bearing bars are to be ASTM A-36 Carbon Steel. Connecting bars are to be per ASTM A-1011 CS type B. Rivets are to be per ASTM A-575. Banding is to be Carbon Steel per ASTM A-36.

F. **Fabrication Tolerances** shall be in accordance with ANSI/NAAMM MBG 532-09 Metal Bar Grating Manual.

G. **Finish:** Gratings and frames shall be **Hot-Dip Galvanized per ASTM A123** (or powder coat painted black as shown on the drawings).

2.4 **Accessories:** Provide appropriate fasteners for type, grade, and class required for the approved anchorage system.

**Part 3: Execution**

3.1 **Field Verification:** Contractor is to provide field measurements prior to preparation of final shop drawings and fabrication where required to ensure proper fitting of the work.

3.2 **Installation**

A. Prior to grating installation, contractor shall inspect supports for correct alignment and conditions for proper attachment and support of the gratings. Any inconsistencies between contract drawings and supporting structure deemed detrimental to grating placement shall be reported in writing to the Engineer, Architect or owner’s agent prior to placement.

B. Install grating in accordance with shop drawings and standard installation clearances as recommended by ANSI/NAAMM MBG-532-09 Metal Bar Grating Manual.

3.3 **Grating Attachment:** Use approved attachment system and fasteners to secure grating to supporting members as shown on plans.
