Case Study

ALUMINUM PERFORATED METAL

Location: Tunica, Mississippi

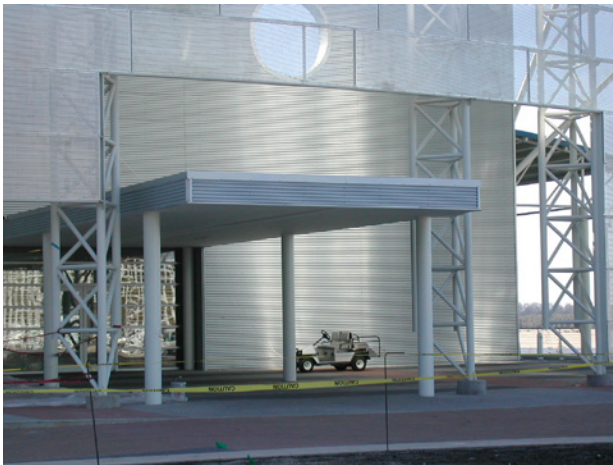

Project Owner: Tunica, Mississippi

General Contractor: Steel & Roof Structures Corporation

Material: .125" thick aluminum perforated metal

Direct Metals supplied a custom aluminum perforated metal job for Tunica RiverPark & Museum in Tunica, Mississippi. The .125" thick aluminum perforated metal was supplied in three different perforation patterns to give depth and artistic flair to the front façade of the river park building. One-third of the job had a 3/4" diameter hole, the second-third had a 1" diameter hole and the remaining perforated metal was supplied with a 1-1/4" diameter hole. The aluminum perforated metal was fastened to a curved galvanized steel tubing frame to create this custom masterpiece!
