DIRECT METALS OFFERS VALUE-ADDED FABRICATION PROCESSES TO THEIR LINE OF METAL PRODUCTS

Kennesaw, GA – October 28, 2019 - Direct Metals, an international steel service center with locations in Kennesaw, GA and Waukegan, IL, is a leader in the industrial metal and fiberglass products industry. In addition to their specialty metal inventory, they are now offering various value-added fabrication processes to their line of specialty metals and fiberglass inventory, including wire mesh, perforated metal, expanded metal, bar grating, safety grating, fiberglass grating, and architectural metal.

To meet the new and high demands of their diverse industrial customers, Direct Metals offers additional processing capabilities such as, cutting, shearing, laser, plasma and water jet cutting, stamping, drilling, blanking, welding, sawing, punching, rolling, and slitting. “We are eager to save our customers time and money by processing to their specifications in an economical and timely manner,” states Tom Hoover, President of Direct Metals.

Direct Metals offers many fabrication services that can improve your processes. They can cut your metal or fiberglass material into pieces, lengths, or shapes as well as shearing to cut straight lines on flat metal stock without the formation of chips or the use of burning or melting.

Another service they offer is laser, plasma, and water jet cutting. This process includes producing a shape, design, or pattern into metals through CNC machine programming and cutting for artistic, structural or architectural purposes.

Their fabricating equipment can handle a broad range of metal sizes and thicknesses therefore processing the material to your specifications. Purchasing it at their facility will be a one stop shop.

With one of the largest metal and fiberglass inventories in the nation, they can quickly and reliably ship the highest quality industrial metal and fiberglass products. To request a quote or place an order, call 1-800-711-4939 or email info@directmetals.com. For an online catalog, visit directmetals.com.
