## DIRECT METALS PROVIDES MATERIAL FOR RESIDENTIAL CONTRACTOR IN CAPE SAN BLAS, FLORIDA

---

March 24, 2020 – Kennesaw, GA – Direct Metals, an international steel service center with locations in Kennesaw, GA and Waukegan, IL, provided specialty wire mesh panels for a custom outside deck area.

Direct Metals provided 3” open .192” diameter wire lock crimp in a stainless steel 316 material. The wire mesh was created in custom panel sizes to fit the specific application. The woven stainless steel T316 is better suited for marine and salt air environments than typical stainless steel T304, so Direct Metals provided this material type for increased durability.

Fabrication processes were also done to the wire mesh panels. The panels were framed in a wood casing to help meet the local code requirements for deck railings, as well as to add aesthetic appeal.

“Direct Metals made the ordering process both quick and easy,” stated the residential contractor. “Their affordability and punctuality was second to none, and I would recommend them to everyone who needs quality wire mesh.”

Founded in 1996, Direct Metals is an ISO 9001:2015 certified company and a leader in industrial and specialty metal products. Direct Metals carries one of the largest inventories in the nation of perforated metal, bar grating, expanded metal, safety grating, fiberglass grating, architectural metals, handrail components and wire mesh products. The company’s products are available in carbon steel, stainless steel, aluminum, copper, brass, bronze, fiberglass or galvanized metal.

Direct Metals offers several processing capabilities, including cutting, shearing, sawing, punching, cut-outs, welding, slitting, blanking, burning, fabrication and various special finishes. The company also provides expedient shipping, with orders for in-stock material placed by noon and shipped that same day. Direct Metals has served customers in the United States and world-wide for over 20 years.
